

# Bitu-Seal.TT07

**Cold Applied Filled Asphalt Water Proof Compound Termite Based**

## USES

- > Repairing of cracks in black top road surface
- > Water treatment structures
- > Parapet walls
- > Vertical walls & roof
- > Water proofing gutters
- > Bridge decks beams and highway pavements

## ADVANTAGES

- > Solvent filled asphalt composition of high calibre
- > Cold applied quick drying with excellent adhesion to wet or dry substrates
- > Ideal waterproofing for concrete, masonry, brick work
- > Long life sandwich membrane for subgrade waterproofing
- > An effective repairer of black top road surfaces without interference to traffic

## PROPERTIES

- > Bitu-Seal.TT07 well on most surfaces such as concrete, brick, asbestos & G.I.Sheets, Asphalt and tiles etc
- > When tested to ASTM D-3409 adhesion to dry and wet surface is found to be excellent

## APPLICATION INSTRUCTIONS

- > Remove all dust, grease & loose matter from the surface to be treated by vigorous wire brushing or compressed air
- > Surface before Bitu-Seal.TT07 application should be smooth. If protruded aggregate or raised concrete lining resulting from concrete from gaps or bleeding of concrete exist. The same should be chisled off to achieve continued smooth surface.

## TECHNICAL INFORMATION

Color	Black
Coverage	.5kg/ m <sup>2</sup>
Storage Life	5 Years

## EFFECTIVE LIFE

- > Properly applied Bitu-Seal.TT07 in exposed state shall have an effective life of 3 years
- > Used as a sandwich membrane in floor or wall construction, Bitu-Seal.TT07 membrane can be considered having an indefinite life..

## HEALTH & SAFETY

- > Bitu-Seal.TT07 contains petroleum solvent. Avoid breathing the vapours. When working in closed atmosphere, ensure adequate ventilation.

## PACKING

- \* 12 Kg Tin 15 Kg Pails, 20 Kg Pail, 200 Liter Drum
